

FORENSIC SCIENCE

ANTH 345

3 credits, MWF
Dr. Phoebe Stubblefield

An exposure to the basic methods and theoretical bases and inter-relationships of the forensic sciences. Whenever possible and practical hands-on exercises will reinforce course topics.

Exploring Human Differences

ANTH 371

3 credits, TR
Dr. Marcia Mikulak

Prerequisite: ANTH171. This class is for the student who is ready to engage in a globalized and richly diversified world in the work place, their communities, and in their friendships. We will openly explore and discuss how we view human differences through the idea of race. Together, we will be invigorated by the new vision we create together of a future multiracial society built on justice and equity.

Lithic Technology

ANTH 426

3 credits, MW
Dr. Melinda Leach

Prerequisite: Anth 172 or instructor permission. Study of prehistoric stone tool technology and examination of the analytical methods used by archaeologists in lithics research.

Senior Honors Thesis

ANTH 489

Dr. Melinda Leach

Supervised independent study culminating in a thesis.

INDEPENDENT STUDIES

ANTH 492, Sections 1-6, 1-4 credits

Multiple Instructors- check Schedule of Classes via Campus Connection

Consent of instructor. Independent research conducted under advisement with department faculty. Research is student originated and developed.

READINGS IN ANTHROPOLOGY

ANTH 494, Sections 1-6, 1-5 credits

Multiple Instructors- check Schedule of Classes via Campus Connection

Consent of instructor. Designed for students who want instruction in subjects not covered adequately in usual course offerings. Special arrangements must be made with an instructor prior to registration.

FORENSIC SCIENCE INTERNSHIP

ANTH 497, 1-12 credits

Dr. Phoebe Stubblefield

Prerequisites: Junior or Senior status, satisfactory completion of Chem 122 and Biol 151, and instructor consent. Students may enroll in this course after they have secured an intern position in a law enforcement agency, crime laboratory or other institution providing procedural and/or analytical processing of evidence from criminal or civil proceedings.

INTRODUCTION TO ANTHROPOLOGY ANTH 100

3 credits, MW
Dr. Elizabeth Scharf

An introduction to the breadth of inquiry pursued by anthropologists, including the origins and biological evolution of humans, the prehistoric development of world cultures, and the interplay of biological, social, and cultural factors in present day societies.

INTRODUCTION TO FORENSIC SCIENCES ANTH 120

3 credits, MWF
Dr. Igor Ovtchinnikov

For those who are curious about the many fields of the forensic sciences but have no previous background in science and/or forensic science. You will explore some of the actual techniques illustrated in popular descriptions of the forensic sciences. In addition to lectures and discussions of the fields of the forensic sciences, students will engage in practical group and individual activities that will promote their understanding of what science is and how it is applied to crime solving and every day life. Students must be able to attend a one-hour laboratory section in addition to lecture times.

INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY ANTH 170

3 credits, MWF
Dr. Phoebe Stubblefield

An introduction to the field of biological or physical anthropology. This course will provide a general background in human evolutionary biology.

INTRODUCTION TO CULTURAL ANTHROPOLOGY ANTH 171, 3 credits

Sec. 1, #7844, 11:00-12:15, TR, Dr. Mihelich

Sec. 2, #7850, 3:30-4:45, TR, Dr. Mikulak

Sec. 3, #7854, 2:00-3:15, TR, Dr. Mihelich

Sec. 4, #7845, Online, Harrison-Urlacher

Sec. 5, #17420, 11:00-11:50, MWF, Dr. Leach

Examination of diversity and similarities across contemporary world societies. Topics: fieldwork and ethnographic description; theoretical approaches; communication/human language; interrelationships between environment, technology, social and political organization and worldview; socio-cultural change; applied anthropology. Films and case studies illustrate intricacies of culture and how an anthropological perspective provides insights about our own society/culture.

INTRODUCTION TO ARCHAEOLOGY ANTH 172

3 credits, MWF
Dr. Elizabeth Scharf

A look at how we investigate past cultures using the artifacts that people have left behind. What questions do archaeologists ask about the past? How do archaeologists find and record archaeological sites? What field and laboratory techniques are used to collect evidence and gather data, and how do these methods work? How do we interpret and understand the past using archaeological hypotheses, explanations, models and theories? Case studies will be drawn from different regions, cultures, and time periods to illustrate course concepts.

WORLD PREHISTORY

ANTH 200

3 credits, MWF
Dr. Melinda Leach

Explore the extraordinary five million year-long record of human cultural achievements, as reconstructed by scientific archaeology. We will focus on prehistoric societies, on what happened in the past, and how the major milestones in the development of world cultures came about. These milestones include the cultural evolution of our earliest hominid ancestors from almost 5 million years ago, the two million year-long persistence of the hunting and gathering lifeway, the origins of agriculture and farming societies, and the rise and collapse of prehistoric civilizations.

Environmental Change & Culture

ANTH 309

3 credits, MWF
Dr. Elizabeth Scharf

To understand how humans have responded to and/or caused environmental changes (including climate change) and how differing cultural values and behaviours have impacted this relationship in various parts of the world.

Human Variation

ANTH 330

~~3 credits, MWF~~
Dr. Phoebe Stubblefield

~~An examination of the range of human physical variation, with a special emphasis on its adaptive nature.~~
