

CSD 584 and CSD 585 Clinical Practicum Attendance Policy

Expectations: Regular attendance is crucial for providing consistent care to patients and meeting clinical competencies. Students are expected to attend all scheduled clinical sessions.

Absences: If a student is unable to attend due to illness or emergency, CSD 584 students must notify the clinical faculty and NPCC staff immediately; NPCC staff will notify the client(s). CSD 585 students must notify their clinical instructor and the graduate program director. Alternative plans will be considered on a case-by-case basis.

Consequences: If a student is absent more than two days per semester, a meeting with your clinical instructors and the graduate program director will be required to discuss your progress, any necessary steps, and how to ensure you are meeting clinical competencies. Extended absences may result in an extension of your graduate program and/or reduction of your clinical grade.
